- Study programs offered in English language
- Excellent connections with the business community
- International students from all over the world
- Student organization for international student
- The most favorable conditions for students

**Erasmus
Mundus**

How Erasmus Mundus has changed my life?

Erasmus Mundus gave and gives me again a great opportunity to be an international student in one of the best European University! For me as experienced labour force it is great possibility to obtain all required knowledge which I realized lacked during my work practice.

It's the time when I understand that to be a student is the precious time for young people, but most of us just dream to finish it as soon as possible and get a job.)))

I'm grateful to Erasmus Mundus program, because I know what I want in future, and this MBA program is one huge step for my dream! So now I appreciate, cherish this moment and I try to spend it as effective as possible.

How Erasmus Mundus has changed my life?

**Erasmus
Mundus**

**The best in the Erasmus Mundus - the opportunity to learn
the culture of the country where you are!**

I admire with Ljubljana and its inhabitants, nature,
and in general whole Slovenia! Besides, we are spreading the
culture of our country at the same time.

The vast importance also is that on this site you meet
a lot of people from different countries with different cultures,
opinions and ideas that only benefit to each participant.

How is the everyday life different from my home city?

The first difference after coming to Slovenia - was the TIME differences)))

Now we can already safely say that here all different and new for us.

Sport - this is important and the best that we see in the Slovenians!

Pets - dogs in particular.

Cleanliness, order of the streets and the thoughts of slovenians are amaze!

To the environment here is drawn a lot of attention !

Nature is wonderful! But honestly sun rarely peeks, but we got used to it.

Well, about student life and the university - it is primarily
government support young people.

Meal Coupon (one of the best for foreigners discovering)))),
urbana card, subvention on housing, student organizations....

All this enables young people to devote himself to science,
and not to think about how to survive tomorrow .

AND THE BEST COORDINATORS!

Thanks a lot and respect to them!!!
